

Patient Report Page

Patient Name: John Doe
Patient ID: 45231
Date of Admission: 2025-07-10
Doctor: Dr. Sarah Mitchell, MD
Department: General Practice

Diagnosis:

Severe Bacterial Pharyngitis (Throat Infection)
Patient presents with severe sore throat, high fever, and swollen lymph nodes. Hospitalization required for IV antibiotics and monitoring.

Prescribed Medication:

- Ceftriaxone IV 1g once daily for 5 days
- Ibuprofen 400 mg every 6-8 hours as needed for pain/fever
- IV fluids as needed

Nursing Notes:

- Administer IV antibiotics and monitor for allergic reactions
- Monitor throat pain score every morning
- Encourage fluid intake and rest
- Prepare patient for discharge after recovery

Measurable Parameter for Data Collection:

Daily Throat Pain Score (0-10)
Nurses must record patient self-reported throat pain score every morning during hospitalization. This will help monitor recovery progress and evaluate treatment effectiveness.
